

Bayswater Education Plan

Fact sheet

We've released the Bayswater Education Plan – a 10-year strategy to inspire and support children and young people in the Bayswater community to aim higher and achieve more at every stage of their learning journey.

Some parts of the plan are already in action. The Victorian Government recently invested more than \$12.433 million to modernise classrooms and improve conditions for students at Bayswater Secondary College.

Beyond improving school buildings, this plan is a framework for the schools and the broader community to work in partnership to improve educational outcomes and create new learning opportunities.

Who's involved?

Five schools have come together to lead the plan:

- Bayswater North Primary School
- Bayswater Primary School
- Bayswater Secondary College
- Bayswater South Primary School
- Bayswater West Primary School

They have worked with us, their parents and students, and universities, industry, and government to develop the Plan. That partnership will continue to deliver it.

What will success look like?

1. Bayswater students engaged, challenged and supported in their learning
2. Happy, healthy and resilient Bayswater children and young people
3. Local community confidence in Bayswater public schools
4. Bayswater children and young people prepared for each stage of their learning and career journey

How will this be achieved?

1. Develop excellence in teaching and learning, and an engaging curriculum across the Bayswater schools

There will be greater collaboration between schools to share excellence in teaching practice and support teachers' professional development. They will work:

- together to develop new learning programs that inspire and motivate student curiosity and passions, such as STEM, arts and music, or physical and health education
- with local universities and tertiary education providers to develop extension and enrichment programs for students across the Bayswater schools.

2. Build pride and confidence in Bayswater schools

Students and schools will always achieve more with the support of their families and the broader community. The schools will promote their shared vision and unique offerings. They will develop new ways to share student progress and celebrate leadership, achievement, and success.

3. Build networks, partnerships, and collective responsibility for student outcomes

This plan will create new partnerships between schools, kindergartens, universities, TAFE, and local businesses.

These partnerships help develop a seamless curriculum and make a smoother transition from early learning through the different school stages and onto further education, training and employment

The schools also want to develop new partnerships with families and carers, giving them more opportunities to become involved in their children's education while supporting academic achievement and staying at school longer.

4. Build integrated and holistic health and wellbeing initiatives within and across the Bayswater schools

The schools already have a strong focus on developing caring relationships and nurturing environments.

Through the plan they will:

- strengthen the health and wellbeing systems that are key to students achieving their best
- continue to support and empower students to develop the knowledge and skills they need for learning, self-awareness, deep intellectual engagement, and thrive as citizens in the 21st century.

Next Steps

In 2022 we are focusing on:

- establishing Working Parties for each focus area
 - each principal will work with a middle leader from each of the schools to lead a Working Party, establish an action and monitoring plan to guide the work in 2022
- a trial and review of the student health program for the primary schools
- develop and implement transition initiatives and activities across the schools
- develop and trial a tailored IT program for Bayswater Secondary College with a local IT industry leader.
